Defining Academic Freedom

Submitted by Cary Nelson on December 21, 2010 - 3:00am

Over the course of decades, a great many books, essays, and policies have been written and published about academic freedom. We have learned how to apply it to pedagogical, technological, cultural, and political realities that did not exist when the concept was first defined. Not only faculty members, administrators, trustees, and students, but also parents, politicians, and other members of the public, would now benefit from a concise summary of its major features. Sometimes academic freedom is invoked in situations where it doesn't actually apply. But many within and without higher education are not well-versed in all the protections it does provide. This statement is designed to help clarify both what academic freedom does and doesn't do.

PART 1: What it does do

1. Academic freedom means that both faculty members and students can engage in intellectual debate without fear of censorship or retaliation.
2. Academic freedom establishes a faculty member's right to remain true to his or her pedagogical philosophy and intellectual commitments. It preserves the intellectual integrity of our educational system and thus serves the public good.
3. Academic freedom in teaching means that both faculty members and students can make comparisons and contrasts between subjects taught in a course and any field of human knowledge or period of history.

4. Academic freedom gives both students and faculty the right to express their views — in speech, writing, and through electronic communication, both on and off campus — without fear of sanction, unless the manner of expression substantially impairs the rights of others or, in the case of faculty members, those views demonstrate that they are professionally ignorant, incompetent, or dishonest with regard to their discipline or fields of expertise.

5. Academic freedom gives both students and faculty the right to study and do research on the topics they choose and to draw what conclusions they find consistent with their research, though it does not prevent others from judging whether their work is valuable and their conclusions sound. To protect academic freedom, universities should oppose efforts by corporate or government sponsors to block dissemination of any research findings.

6. Academic freedom means that the political, religious, or philosophim means

12. Academic freedom guarantees that serious charges against a faculty member will be heard before a committee of his or her peers. It provides faculty members the right to due process, including the assumption that the burden of proof lies with those who brought the charges, that faculty have the right to present counter-evidence and confront their accusers, and be assisted by an attorney in serious cases if they choose.

PART 2: What It Doesn't Do

1. Academic freedom does not mean a faculty member can harass, threaten, intimidate, ridicule, or impose his or her views on students.

2. Student academic freedom does not deny faculty members the right to require students to master course material and the fundamentals of the disciplines that faculty teach.

3. Neither academic freedom nor tenure protects an incompetent teacher from losing his or her job. Ac

8. Academic freedom does not protect faculty members from sanctions for professional misconduct, though sanctions require clear proof established through due process.

9. Neither academic freedom nor tenure protects a faculty member from various sanctions — from denial of merit raises, to denial of sabbatical requests, to the loss of desirable teaching and committee assignments — for poor performance, though such sanctions are regulated by local agreements and by faculty handbooks. If minor, sanctions should be grievable; if major, they must be preceded by an appropriate hearing.
